

$$V_c^{ab} = \mathcal{H} \left( \begin{array}{c} \hat{c} \\ \begin{array}{cc} a & b \end{array} \\ \bullet \end{array} \right)$$

The diagram shows a genus-2 surface, which is a torus with two additional holes. The surface is represented by a light gray shaded region with a black outline. Two circular holes are cut out from the surface, labeled 'a' and 'b' above them. A black dot is positioned at the bottom center of the surface. The entire diagram is enclosed within large parentheses. Above the right hole, the label  $\hat{c}$  is written.
