

$$V_c^{ab} = \mathcal{H} \left(\begin{array}{c} \hat{c} \\ \begin{array}{cc} a & b \end{array} \\ \bullet \end{array} \right)$$

The diagram shows a genus-2 surface, which is a torus with two additional holes. The surface is represented by a light gray shaded region with a black outline. Two circular holes are present, labeled 'a' and 'b' above them. A black dot is located at the bottom center of the surface. Above the right hole, the label \hat{c} is written. The entire diagram is enclosed in large parentheses, and the expression is preceded by an equals sign and the symbol \mathcal{H} .
