

A Feynman diagram consisting of a red circle (loop) with a red line entering from the top-left and exiting from the top-right. A dashed red line extends downwards from the bottom of the circle.

$$= R_{\text{I}^T T}$$

A Feynman diagram consisting of a red circle (loop) with a red line entering from the top-left and exiting from the top-right. A solid red line extends downwards from the bottom of the circle.

,

A Feynman diagram consisting of a red circle (loop) with a red line entering from the top-left and exiting from the top-right. A dashed red line extends downwards from the bottom of the circle.

$$= R_T^T$$

A Feynman diagram consisting of a red circle (loop) with a red line entering from the top-left and exiting from the top-right. A solid red line extends downwards from the bottom of the circle.
